

DEVON OKAFOR

Email: devon.okafor@gmail.com · GitHub: github.com/devokafor-dev

DESIRED ROLE: Full Stack Developer

BACKGROUND

No formal computer science or information technology education. Completed one semester of a general studies program at a community college before leaving to work full-time. Became interested in web development after watching a YouTube tutorial series and decided to pursue it as a career path.

SELF-DIRECTED LEARNING

freeCodeCamp — Responsive Web Design Certification (2024)

- Completed HTML and CSS modules
- Built four tribute page and survey form exercises as part of the curriculum

Single YouTube tutorial series: "HTML and CSS for Beginners" (2023)

- Followed along to build a static personal homepage
- No JavaScript, no deployment

No formal coursework in programming, algorithms, data structures, or computer science of any kind.

WORK EXPERIENCE

Cashier — Food Lion, Charlotte NC (Aug 2022 – Present, full-time)

- Customer transactions, cash handling, inventory restocking
- No technology or software responsibilities

Warehouse Associate — Amazon Fulfillment Center (Jan 2022 – Jul 2022)

- Package sorting and order fulfillment
 - No technology or software responsibilities
-

PROJECTS

Personal Homepage (2023)

- Static HTML and CSS page listing personal interests
- Hosted on GitHub Pages by following a step-by-step guide
- No JavaScript, no interactivity, no backend component

freeCodeCamp Certification Exercises (2024)

- Four HTML and CSS layout exercises completed as part of certification
 - No JavaScript used; no deployment beyond freeCodeCamp's embedded preview
 - Not independently designed; followed prescribed specifications
-

TECHNICAL SKILLS

HTML: Basic — can write semantic markup from scratch

CSS: Basic — understands box model and basic flexbox; no CSS frameworks

JavaScript: None — has not written any JavaScript

Python: None

Any backend language: None

React or any frontend framework: None

Node.js, Express, or any backend framework: None

Databases (SQL or NoSQL): None

REST APIs: Knows what they are from reading; has never built or consumed one in code

Version control (Git): Minimal — used GitHub Desktop to upload a folder once; no CLI

Testing of any kind: None

Cloud, DevOps, or deployment: Used GitHub Pages setup guide once; no CLI experience

Algorithms or data structures: None

TypeScript: None

Authentication or security concepts: None
